

RECOMMENDED RADIO FOR USE WITH THE RANGELY REPEATER

The recommended radio for use with the Rangely repeater is the BAOFENG UV-5R 8 Watt radio available at amazon. This model has been proven to work. There are many different packages available depending on your needs. A couple examples are shown below. Some considerations you may want to consider:

1. Do you need included programming cable and software?
2. Do you want extra batteries?
3. How many radios do you need?
4. Do you want an external microphone and speaker?

The radio can be programmed for you by arrangement at a WRAP meeting. From time to time basic radio training is offered at a WRAP meeting. Check the calendar to see if a training session has been scheduled.

Search Baofeng UV-5R 8 Watt at Amazon to see what is currently Offered.
